Four to Get Special Awards

Merrit de Jong Jr. . . Y prof
med Distinguished Teacher.

Joseph Fielding Smith . . . LDS
leader to receive BYU award.

Willard Gardner . . . USU physi-
cist to get Talmadge award.

B. F. Larsen . . . former Art
Dept. chairman to be honored.

BYU to Honor 3 Educators, Church Leader

Four men who have given dis-
tinguished service and achieved
high scholarship will receive spe-
cial awards at the Brigham Young
University Commencement June
3. This is the third year these
special honors have been con-
ferred.

Joseph of the Council of Twelve
Apostles and the Church of Jesus
Christ of Latter-day Saints, will
receive the BYU Special Service
Award.

B. F. Larsen, professor emer-
itus of art and former chairman
of the BYU Art Dept., will re-
ceive the David M. McKay Hum-
anities Award.

DR. WILLARD Gardner, pro-
fessor emeritus of physics at
Utah State University, has been
chosen for the James Clark
Scientific Achievement Award.

DR. GERRIT de Jong, Jr., profes-
sor of modern languages and
dean emeritus of the College of
Fine Arts at BYU, will be cited
as the Karl G. Maeser Disting-
uished Teaching Award.

PRESIDENT SMITH has served
as 21 years as chairman of the
Executive Committee of BYU, longer
than any man in the his-
tory of the institution. He also
has been a member of the Coun-
cil of Twelve Apostles for half
a century.

He church historian and
president of the Genealogical
Society of America, the
world's largest genealogical
library. He has served as a mission-
ary in Great Britain and as a
member of the Desert Sunday
School and Young Men's Mutual
Improvement Association Gen-
eral Board.

DR. LARSEN served the university
for half a century. The 78-year-
old artist has done graduate work
at the University of Chicago and
the Sorbonne Institute of Chi-
cago and at a number of leading
art schools in Paris. He has stud-
ied under some of the finest
teachers of this country and Eu-
rope including Henrie Royer, Pi-
erre Laprade, A. Dechandia, and
André Lhote.

DR. de JONG, an accom-
plished linguist, musician and artist,
organized the College of Fine
Arts at Brigham Young University
in 1925 and served as its
dean until August 1946. He is
now devoting his time to teach-
ing modern languages, expand-
ing the Portuguese program at
BYU, and continuing with an
international program of music
composition.

In 1942 he was one of a com-
mittee of 25 of the Council of
Learned Societies appointed by
the federal government to estab-
lish courses and foster teaching
of Portuguese in American uni-
versities.

DR. GARDNER, a past presi-
dent of the Utah Academy of
Sciences, Arts and Letters, has
taught at BYU, University of
Tulane, and the University of
Utah and has served as physi-
cist at the Experiment Station
at Logan. His interest in research
has been soil, physics, ground
water, and soil erosion.

Some of his work in the field
of modern soil physics, Dr.
Gardner's studies have largely
dealt with the basic laws
governing the movement of wa-
ter in unsaturated soils.

Arrives in Paris Today . . .

Herter Early Bird in Summit Migration

PARIS, May 13—(UPI)—Key
figures of the Summit Conference
start drifting into Paris to-
day to prepare for the first top-
level East-West meeting in five
years.

Secretary of State A. Herter was due at Orly Air Field
at noon to begin the influx that
will lead to the momentous conference Monday.

BRITISH Foreign Secretary
Stanley Lloyd, Soviet Foreign
Minister S. Khrushchev and Soviet
Foreign Minister Andrei Gromyko
are due tomorrow. President
Eisenhower and Prime Minister
Harold Macmillan will arrive
Sunday.

Khrushchev is arriving a day

earlier than originally expected
—the change of plan was an-
nounced yesterday—and some
American diplomats feared it was
deliberately arranged to establish
a propaganda beachhead before
Eisenhower's arrival.

IF SO, the Soviet leader could be
expected to continue to exploit
the incident of the American
spy plane captured deep in
Soviet Russia.

Other diplomatic authorities
said Khrushchev might be com-
ing early to seek an intimate
discussion with French President
Charles De Gaulle at which he
might probe for any cracks in the
Western front developed by
the plane affair.

IF SO, he was doomed to fail.
France and British officials
made it clear that the Western
front was solid as ever in its
positions on Berlin, Germany
and disarrayed the three
principal Summit topics.

Caltech Prexy To Give Talk At Next Forum

Lee Alvin DuBridge, presi-
dent of the California Institute
of Technology, will speak to the
students of Brigham Young
University on Monday's forum as-
sembly.

DR. BRIDGES, an eminent
geophysicist, has been president
of the school since 1946. He served
on the National Defense Commission
1940-45, and has been on the
General Advisory Atomic
Energy Commission since 1947.

The Caltech president has
won several awards. Among
them are the King's Medal for
"service in the cause of freedom."
1948; Research Corporation
Award, 1947.

MIA Plans World Tour Through Song, Dance

Music and dancing with an around-the-world touch will
be presented at the annual Brigham Young University Stake
arts festival, Friday.

Admission to the program, "This Is My Father's World"
is free. The show will be in Smith Fieldhouse.

DURING THE evening the Stake MIA Chorus will sing
as dancers perform numbers
from Italy, Spain, New Zealand,
and Japan, plus other folk dances,
modern dances and novelty
numbers.

Participating in the dancing
are BYU students from the 26
wards in the old BYU Stake. A
special Maori number will also
be done.

ALL-WOMEN's dances will be
done to "The Time" and
"Rippled and Flowed." Men
and women will join in to dance
to a Japanese mining song, "Tan-
ko Bushi." Dance directors will
do "Carmen Carmelise" with a
variety of Latin-rhythmic steps.

Others will do "Circle" and
men dancers will do a vigorous
"Click Go the Shears." Also on the program
will be numbers to "Dixie
Land," "So Long Ga Do" and
"Song of Gondwanaland."

THE NATIONAL anthem
"March of Harlech," "Carry On"
and "Our Father's World" will
also be presented.

Some numbers will feature
original choreography. The pro-
gram has been directed by stake
dance and choral directors.

PRETTY POSERS—Dancers Sharee Hughes, Deonne Sorenson, Pat Kimball and Charlene Hancock (l-r) pose in dance costumes before tonight's Stake MIA Arts Festival.

Engine Pioneer lectures Twice at Symposium

John O. Almen, an early pio-
neer in aviation engine and auto-
mobile engine development, will
be the featured speaker at the
Engineering Symposium to be
held at Brigham Young Uni-
versity Saturday.

REGISTRATION for the event
begins at 8:30 a.m. in 167
Hawthorne with the general session
beginning at 9:30 a.m.

Section meetings will be held
in the McKay Building during the
day to cover the subjects, "Mat-
tens and Design," "Heat Trans-
fer and Fluid Mechanics," "Auto-
matic Control" and "Computers
Transistors."

Indian Youth Gather

Each year groups of Brigham Young University students travel over the nation to attend conferences and conventions of various organizations. Recently a group of BYU Indian students attended the fourth annual Southwestern Indian Youth Council at Albuquerque, N. M.

The BYU group did more than "sit in" on the sessions, since two of its members, Melvin Thom, Schurz, Nev., and Elizabeth Cook, Hogansburg, N. Y., were president and secretary of the council for this year.

The council was attended by 350 representatives of 57 tribes coming from 17 western states. For three days the delegates discussed current Indian problems and heard youth from over the West express themselves.

In addition, they participated in workshops led by older tribal leaders. This was significant because it represents a trend toward helping the youth identify themselves with the older members of their culture while at the same time surging forward in new fields of learning and development.

In the past when Indian youth left the reservation to become culturalized in the white society, many times they became isolated entities. They weren't fully accepted by the whites and were cut off from their people as well. These regional youth programs help overcome this problem.

As Robert Gwiliam, BYU Indian student adviser put it: "By participating in councils such as this and by maintaining identity with their tribal background, these youth become part of the solution to their problem instead of merely isolated units of that problem."

We are aware of the progress being made in the area of Indian affairs and pay tribute to the Indian youth, the tribal leaders and those others whose efforts make such progress possible.

This Week We Honor

Editor's note: In the "This Week We Honor" section Daily Universe readers will notice that there were four persons honored this week. This was because of the number of weeks left in the school year; we felt the number of colleges who will submit students for the honors column

Marsha Hoyt

Marsha Hoyt, a senior music education major from Nephi, was nominated by the College of Fine Arts for "This Week We Honor."

Mrs. HOYT, who has a 3.3 grade point average, is a member of the A Cappella Choir and White Key. She was a soloist in the University Chorale. She also participates in the Madrigal Singers.

Mrs. Hoyt is ward choir director for the Stake Sunday School board.

She plans to do graduate work in music next year.

Charlene Johns

"This Week We Honor" pays tribute to Charlene Johns, a senior music major from Los Angeles, Calif. Miss Johns was nominated by the College of Fine Arts.

Mrs. JOHNS, who has a 3.4 grade point average, is a member of the Student Program Bureau, A Cappella Choir and SportsWomen.

She has sung with two BYU musical groups, the Classics and the Forties.

Mrs. Johns was ward organist for the 4th Ward last year. She is engaged to be married in September to Jim Steele from Ogden. Her future plans, after the wedding, are to teach school in California.

She plans to do graduate work in music next year.

Two Mohawk Students Exemplify Concepts in Indian Youth Education

Cook Family Cited In 'New Yorker'

by Larry Day

Daily Universe Editor

"From the time we were little children, our father told us to be proud of him and to tell him to be proud of it. That is the way we've grown up." But she wasn't wearing moccasins and she didn't have a feather in her hair.

IN FACT, seeing her sitting in front of Roger Cook's tall, dark, a blue denim skirt and white blouse, one would be inclined to doubt that Elizabeth Cook, a ced from Hogansburg, N. Y., were anymore Indian than Eleanor Roosevelt.

Elizabeth she prefers to be called, is a senior at Brigham Young University. She is majoring in French, minoring in English and plans to teach high school after she graduates next year. And blue skirt, white blouse and a gold social unit necklace, notwithstanding, Litz is a Mohawk Indian.

She and her brother, Philip, a graduate geology student, are representative of the hundreds of Indian students who are presently attending the educational and cultural advantages of the white culture while at the same time maintaining their identity as Indians, heirs to a great Indian heritage.

SECH HAS not always been the case. In the early days of the Spanish conquests it took a Papal decree to even convince the Spaniards that Indians were human beings.

For centuries there was a standard procedure for dealing with the Indians. The Indians were to be converted to the white man's ways. "No hay que darle al razon al indio semejante a tanta," which means, "Don't give an Indian a break, even if he is right."

FINALLY when the movement started to educate the Indians, the program was based on the principle that the young Indians out of the tribal environment, teaching them the ways of civilization and sending them back to ridicule and belittle the old life.

The new concept, which is developing in Indian education today, is to have the young Indians learn the skills and theories of the white culture, and at the same time remain identified with their Indian culture and heritage.

GOING back to Litz and Philip there is another little known aspect about them which could well be developed into a whole feature article by itself.

Last fall in the New Yorker magazine there appeared a series of articles entitled, "Apologies to the Iroquois," by noted author Edmund Wilson. In the articles Wilson delved extensively with the Indian culture of New York State. He went into the legends, the history of treaties, the treatment of Indians since colonial times.

THE EMPHASIS of the series, however, was on the Iroquois of today and their fight to regain their lands and establish status. The series of articles has since been published as a book.

In the first article in the series, Wilson tells of the conversion of Litz and Philip's father to the Indian religion of the latter-day Saints. Philip Cook, Sr., who was one of 15 children was, as many of the Mohawks are, a steelworker, and had traveled with his parents throughout the state.

WHEN HE was 20, he returned to the town of Hogansburg, N.Y., which is situated in the center of the St. Regis Indian reservation. Cook began studying more and more about his Indian background and history after which he and his brother accepted offices as elective chiefs of the tribe.

As he studied and talked to the Indians he became convinced

DANCE COSTUME—Philip and his sister Elizabeth examine part of Philip's Indian dance costume. Elizabeth was recently chosen to play the lead in a new BY motion picture production entitled "The Legend of Tin Panogos." Philip is a Geology graduate.

that he must break with the Roman Catholic church of which most of the Indians were members. He made the break and took his children out of the parochial school. There followed a very bleak time for the Cook family, the New Yorker article says. Cook was quoted as saying, "I had hardly a friend in the world."

COOK WAS seeking a return to the simple truths that he thought a religion should enjoy. After investigating various religious paths, Cook went back to the old Longhouse religion founded by the Indian prophet Handsome Lake.

It was at this juncture, early in 1950, that two LDS missionaries began calling on to convert the St. Regis area. They stopped at the home of the Cooks but the elder Cook wasn't interested—he'd seen enough of white men's religions.

Later, as he was driving to town, Cook saw the two young men walking along the road. He gave them a lift. As they drove along he became interested in the claims of their sacred book that the Indians came originally from Jerusalem.

COOK WAS suspicious and in a flash of resentment told the missionaries that if they couldn't prove their claims he would have them arrested in the reservation. Time passed and nothing more. The missionaries did not run off the reservation, but Cook joined the

THE ONLY WAY TO PLAY BASEBALL IS TO USE TWO HANDS!

CAMPUS SCENES

by Edward Geary

All I've got to say about BYU is that things have me to a pretty pass. It's getting so that you can't do anything but get an education around here anymore.

Only a few years ago (you career students will remember it) life was pretty nice around here. Girls came to school to find husbands, men came to school to keep on going to work, and teachers came to because—well, I'm sure they had some reason or other. Everything was orderly and relaxed, and a person had time to develop a personality. In those days the lawns were the real center of the University. They had buildings scattered around for shelter in case a storm came up, and they had a library to save students the necessity of buying the *Utah Evening Post*. It was a soft and wonderful time. The dorms had hot water, you could cut the meat, you didn't make a Federal case out of it if a girl got a few minutes late...

BUT NOW, ALL this is going. They're clamping down. Only yesterday, the effect was finally felt in that outpost of the past, Allen Hall. They made us put up our screen—and for no good reason at all; my roommate only slightly injured when he fell out of the window, it was just a friendly little tussle.

That's the way things are all over now. The "right Your Understanding" thing has gotten out of hand—people are taking it seriously. They sit on the bunks, as before, but with books. You step into the sweatshirt and see rows and rows of people with books strapped up in front of them. Of course, there's nothing wrong with this. I often do it myself to keep the light on while I sleep. But these people are studying, if you imagine it.

ONLY THE OTHER day I made the acquaintance of a seemingly normal girl. She smiled at me, fluttered her eyelids and said "What can you tell me about the Quantum Theory?"

This same girl tricked me into a terrible new thing called a "study date." Say, did you know that the Grant library has two floors? It's quite a place, I may go back sometime.

The fever is even getting to me. I had a C last quarter, spoiling my average. It's getting tough to stay probation, and when I'm gone who will there be who members the way a college should be run? Mark my words, if they're not careful they're going to have half the freshmen coming back to get an education.

Campus Quickies . . .

Relations Committee Holds Interviews of Officers Today

The student public relations committee is holding interviews with public relations officers on Friday between 3 and 4 p.m. at the Smith Building, between 9 a.m. and 4 p.m. The information gathered is needed to keep record of the senior class.

Positions Open

Honor Council positions for next fall's council are now open, according to Dick Stratford, new chairman.

Those interested are urged to fill out applications and make an interview appointment in the student coordinator's office, basement of Clark Student Service Center, as soon as possible.

Songleaders Tryout
Final selection for songleaders will be held today in the north gym of the Smith Fieldhouse. All contestants are asked to be in the gym at 5:30 in proper dress for judging. Further details, call Judy E. Ext. 3481 or Kaye Cox, 5-3491.

Seniors Needed
Senior students are urged to look out an alumni information card.

Beginning Monday night Wednesday, these forms will be filled out in the lobby of Smith Family Living Center, Curington Science Center or the

Man of the Week . . .

Khrushchev Blasts Summit Proposal

by Phil Newsom
UPI Foreign Editor

MAN-OF-THE-WEEK: Soviet Premier Nikita Khrushchev.

The Place: Moscow.

The Quote: "If the Summit Conference does not take place well, we have existed 42 years without one. We can go on for another 100 years."

There was little chance the Summit Conference would not come off in Paris next Monday as scheduled. But Khrushchev's crack was another example of the Soviet Premier's hug-and-sling type of diplomacy.

For more than a week, he has had a field day of propaganda overhauling down of an American jet plane in a spy mission over Russia.

ONE MINUTE, Khrushchev has rattled the trumpet of nuclear reprisal against the United States and its allies should such incursion continue.

The next, he has uttered soothsaying words of hope for progress at the summit sessions.

There was no doubt that the U.S. reconnaissance mission that failed gave Khrushchev a golden opportunity to present himself as a tough guy on the evening of the summit.

But to trained observers his words seemed designed to get what was really endangering the top-level meeting he has sought for so long.

FURTHERMORE, the angry

Moscow from Khrushchev and his Soviet sympathizers had for the most part avoided putting any blame directly on President Eisenhower for the abortive jet spy flight.

But as the president stood firm in his view that such intelligence operations were perhaps distasteful but a vitally necessary measure for Western defense, Khrushchev became personal in his attacks.

He purported to be "horrified" that Eisenhower had endorsed such methods when he made "aggressive acts," and indicated he might be thinking of hedging on the President's planned visit to Russia in June.

Nikita Sergeyevich Khrushchev was born the son of a Ukrainian coal miner in the village of Kalinov on April 17, 1894. He worked long hours as a youth. He was a shepherd, an apprentice fitter in a factory, and a coal miner.

He hitched his wagon to the ascending stars of Lenin and Trotsky in the Bolshevik Revolution of 1917, and joined the Comintern.

IT WAS through the party that he worked his way up to the top, concentrating all his efforts in the Ukraine. By 1949 he was

TRAILER RENTAL

LOCAL AND ONE-WAY
Show Rental & Repair
310 S. 4-W. FR 3-8969

a member of the Soviet Communist Party's Central Committee and by 1953 a member of the party's presidium.

When Josef Stalin died in 1953, Khrushchev was given the succession, and came out on top in the number one position of Party Central Committee secretary. He took over the spot formally on Sept. 13, 1953, and five years later, in April, 1958, took over the job of premier.

It is in this role that he will meet with President Eisenhower, British Prime Minister Harold Macmillan and French President Charles De Gaulle next week in sessions that can shape the future of the world.

THE WESTERN leaders—who already know their man—will be prepared for a hard-headed, opportunistic bargainer.

They are the heads of government for their nations, but Khrushchev is the kind of man who can say, as he did this week, "I am responsible for the Soviet government."

Why Do Some Stars Expand?

BYU Physicists Search Sky For Answers to 'Star Riddles'

by Chris Allred
University Feature Writer

Why do some stars pulsate or expand every few hours? Why do some stars have extremely slow speeds of rotation?

A research project now being conducted by the Brigham Young University Physics Dept. is searching for the answers to these and other questions.

Dr. Delbert H. McNamara (top photo), professor of physics and mathematics, and Loren Anderson, (center, bottom photos), graduate student, have been working on this project, which is investigating the physical structures and properties of stars.

One aspect of their research has been to determine the reasons that stars in the Beta Canis Majoris group have small rotational velocities and pulsate.

ALL STARS IN THE sky are classified according to their temperature and luminosity as compared to our sun. The name Beta Canis Majoris refers to a group of 10 stars which are 1,000 times brighter than the sun and have temperatures of 20,000 to 22,000 degrees Centigrade.

In order to find out which stars will fit into this classification, a Cassegrainian Photoelectric Photometer is used by Dr. McNamara. The Photometer was built by the Physics Department and is attached to the BYU telescope located in the observatory on top of the Eyring Science Center (top photo).

THE PHOTOMETER measures the light radiating from a star. Starlight is picked up by a photo-electric cell, which is more sensitive to light than the naked eye.

Various filters are used in the photometer to pick up the different colors of starlight. A blue filter is used to intercept blue light and a yellow filter is used to intercept yellow light of a star.

Measuring the color of a star is one method of determining the temperature of the star. The intensity of starlight in various colors is closely associated with temperature, says McNamara.

STARS CAN BE FITTED into two basic categories, hot and cool. Hot stars emit a great deal of blue light and very little yellow light. Cool stars send forth a lot of yellow light and very little blue.

The colors are measured in terms of deflections recorded by electric means on a chart (center photo). The chart is then studied and star temperatures assigned on the basis of light deflections.

For instance, a star which records a very high blue deflection and hardly any yellow is a hot star. The higher the blue deflection, the higher the temperature of the star.

The luminosity of the star is determined by how much light in all is received by the photometer.

THE NEXT STEP IS to determine the rotational velocities of the Beta Canis Majoris Group.

Rotational speeds of stars are determined with the aid of spectrograms or pictures of a star's color band. The color band ranges from red to violet and has narrow vertical bands running through it.

These spectrograms are taken with the 100 inch telescope at Mt. Wilson Observatory in California.

The rotational speed is determined from the contours of the vertical lines in the spectrogram. A star with sharp clear lines is rotating slowly and a star with washed-out lines has a fast rotation.

SPECTROGRAMS OF STARS with known velocities are rotated and compared to spectrograms of stars whose velocities are unknown in a machine called a comparator (bottom photo). If the characteristics of the two spectrograms are the same, the unknown star is assigned a rotational velocity like that of the known star.

Beta Canis Majoris stars have been found to have rotational velocity of 20 miles per second.

The problem with the Beta Canis Majoris stars is that they rotate very slowly as compared with the average rotation of 180 miles per second which stars with similar characteristics have.

BETA CANIS MAJORIS stars also pulsate, or expand and contract, in a period of 33 to 6 hours.

"We are trying to discover why all the stars with luminosity and temperatures similar to the Beta Canis Major Group do not pulsate," stated Dr. McNamara.

The difference in rotational velocities is thought to be the reason why stars do or do not expand and contract. The faster a star rotates, the less pulsation is observed.

"Our present hypothesis is that when stars rotate fast they do not pulsate. We are now trying to prove it," Dr. McNamara concluded.

Giants, Braves Vie for Top Honors

by Fred Down

United Press International
The National League race is fast shaping up into a battle of San Francisco pitching against Milwaukee power.

IT'S AN IRONIC twist for the rival managers, too, because Bill Rigney of the Giants has always been an advocate of "crash" long-ball hitting—and Charlie Dressen of the Braves has always championed the inside baseball.

But neither has any reason to complain today with their teams already wiping out the bitter disappointment of 1959 when the Los Angeles Dodgers "stole" the flag from them with a late-season rush and a post-season play-off victory.

The front-running Giants stretched their winning streak to six games Thursday when they beat the Philadelphia Phillies 1-0, while the Braves need their long-ball "punch" for the second straight day to down the St. Louis Cardinals, 4-3. The Cincinnati Reds scored 13 runs in the first two innings and cruised to a Chicago City 14-1 in the only other N.L. game.

Gary Bell became the American League's first four-game winner of the year when he pitched the Cleveland Indians to a 3-2 win over the New York Yankees and Tom Brown's two-hitter beat the Boston Red Sox to shade the Chicago White Sox, 1-0, in other big league action.

JACK SANFORD continued the amazing San Francisco pitch-

ing streak through 20 shutout innings Thursday with a two-hitter embellished with 17 strikeouts. The Cards' John Jorgenson, once of the previous day, As a result, a mere recall of San Francisco pitching exploits reads like Rigney has the Hall of Fame staff going for him. Four shutouts and five one-run games, one no-hitter, and the two-batters and three three-hitters.

Robin Roberts had a no-hitter until two were out in the fifth inning but then the Giants scored the game's only run when Willie

Kirkland singled, stole second, went to third on a wild throw and tallied on Hobie Landrith's single to right. The Cards' third against one loss.

Eddie Mathews' third Homer in two games and sixth of the season gave the Braves their second and straight victory after the Cardinals whittled away at Bob Feller's 10-inning 1-0 lead. Bill White led the St. Louis comeback with two run-producing doubles and the Cardinals tied it in the eighth on three walks and Curt Flood's sacrifice fly.

In sharp contrast to San Francisco's staff, Braves' pitchers have hurled four complete games and two in which the opposition was held to one run.

Stake Play Day Set

May 21 and 22 are the dates for the 4th running of the Great Lake Sports Car Road Races at Airport No. 2 in West Jordan, Utah.

THIS YEAR'S exciting event will again see drivers from the western states competing for championship points on the 2.7 mile course. Entry fees from Los Angeles, Denver, San Francisco and Reno assure a fine field of top sports car pilots for the popular Salt Lake event.

Over 10,000 fans acclaimed last year's event as one of the most exciting sports shows ever seen and this year's program shapes up as even better.

AN IMPORTANT change has been made in the course to make it more spectator friendly, so from a spectator standpoint so that almost the entire course can be seen from one vantage point.

Extreme potent race imports and American sports cars special will be expected to break the 146-mile per hour trap record set in 1957 and all other lap records of the 14 turn 2.7 mile circuit.

Looks
at

LIFE

The BYU Music Dept. is out of it. Really. Two recitals and a number on this morning's assembly have been presented this week by the faculty and students of this department. And have they played one, just one, rock 'n' roll number. They have not. They are obviously behind the times. Just as I used to be. One teenage girl has to say about the modern music situation: "When I hear a Beethoven symphony, I don't feel anything. When I hear our kind of

music, I feel something way down deep, like oatmeal." The atrocious noises of radio and television have hit the spotlight again. The Great White Teeth of rock 'n' roll was up to its lacquered locks in "Clarkola" last week as an unsympathetic Congressmen continued their inquiries into "payoffs" and other slightly unethical forms of money-making. And the great Beethoven, Clark, was not enough for one week, the rock 'n' roll Second Coming occupied the television screen as Elvis Presley ended two years in the army with a \$125,000 performance last night on the Frank Sinatra show.

Yes, it's obvious that the Music Dept. is out of it. Old-fashioned. Behind the times. Missing the boat. Etc. Etc. There is only one comment that is apropos: Thank heaven. (Actually, we're overdoing it. The BYU Music Dept. is one of the most progressive in the country in its efforts with modern composers and modern compositions.)

SOCIAL SIGNIFICANCE

It was one of the most significant events of the twentieth century. The whole world had waited breathlessly for years. Now it was happening. *Life* knows a significant story when it sees one. Off went a plane load of photographers and reporters. Special efforts were made so a significant cover (below) would make press deadlines. Yes, it's true, Margaret is married. Ten pages and a cover worth. For you that are interested, her husband's charwoman was invited to the wedding. Other significant details about. . . Probably doesn't mean much, but an American spy was shot down in Russia last week. . . After all, Khrushchev will never be a princess. Nor will power.

HIGH SORORITY

BYU social life is missing a bet. Sigma Alpha Theta sorority at C. W. Post College of Long Island University has the right idea. The sorority sisters made Mrs. Marjorie Merrimether Post May an honorary member. Mrs. May responded marvelously. She invited the sorority to Washington where she put its members up at a hotel, gave them a cocktail party to which she invited eligible Washington bachelors, and gave them a dinner party. There must be a millionaire or millionaires who'd like to be an honorary social unit member. Money is no sign of sanity.

CONVENTION CORNER

With the 1960 political conventions approaching, *Life* takes a look at one of the wildest on record, the 1912 Democratic nominating convention. Author Walter (A Night to Remember) Lord describes the days when bombast filled the air. Bryan outwitted bosses, balloting went on and on—and the Democrats chose Wilson.

AND FOR COMIC BOOK READERS

Life also presents: hikers in Utah; art in Pittsburgh; Germans in strength; scientists in high school; athletes in swimming; historians in "The Unconquered"; vice in the theater; swimmers in color; fathers in first grade; and "The Secret of the Bardot Look" in bras.

University Sports Editor
UWU's baseball team takes a week's rest while the Cougar and tennis teams keep up their hectic spring schedule of competitions.

THE COUGAR diamondbacks, own a 7-3 record, are a full nine behind Utah's front-running team. The Utes meet BYU on Saturday to make up the games that BYU and Monmouth lost to the Cougars. The Cougars are 7-1 as of now.

Coach "Buck" Dixon's netters Utah in Salt Lake City to decide the Western Division title and field crown that they've held firmly for the last seven years. The week after the Cougars make the journey to Missoula.

Tennis Mentor Announces SinglesTourney

An intramural men's singles tennis tournament will be initiated for the first time this year at BYU. Coach Buck Dixon announced Tuesday.

ANY MEMBER of the student body who wishes to compete in the tournament will be a single elimination with the first round beginning Tuesday.

Dr. T. Earl Pardoe, former tennis coach at BYU and professor emeritus of speech, will present the awards to the winners, especially to the outstanding singles player in the school as determined by a tournament held annually.

ALL THOSE wishing to enter may do so by registering in the Intramural office, room 222 Smith Fieldhouse, or by contacting Coach Dixon by Monday afternoon.

The draw will be arranged so that matches can begin Tuesday. The schedule will be available in Coach Dixon's office.

The draw will be arranged so that matches can begin Tuesday.

The schedule will be available in Coach Dixon's office.

SOH to Be Feature Speaker at All-Day Softball Clinic

Clark Stohl, a member of the General Board, will be the featured speaker at the Softball clinic to be held Saturday on the BYU campus.

THE CLINIC, which will be a day-long affair especially designed for softball coaches, is being directed by Glen Tuckett, CU baseball coach.

First softball clinic sessions will begin at 9 a.m. in George Albert with Fieldhouse. Stohl will dress the group at a noon session.

Utah Young Democrats to Hold College Conference in Salt Lake

Young Democrats of Utah will be held Saturday at the University of Utah Union Bldg.

ALL COLLEGE students and high school seniors are invited to attend according to Joe Wise, college coordinator.

Meetings will be held at 10:30 a.m. and 1:30 p.m. The conference will conclude with a banquet at 7:30 p.m.

SPEAKERS WILL be Charles Manan of Washington, D.C., chairman of the National Democratic Student Federation, Utah Senator Frank Moss, and the

four Utah Democratic governor candidates.

Students and faculty members from colleges in Utah will participate in a panel discussion.

A \$350 SCHOLARSHIP will be awarded to the winner of an essay contest at the banquet.

Civil Defense Plans Workout For Weekend

A community-wide Civil defense workshop, one which will deal primarily with fallout shelters plus other phases of the Civil Defense program, is scheduled for May 13-14 at Provo High School. BYU students are invited to attend.

Among those scheduled to give instruction and lead discussions are five OCD officials from headquarters in Battle Creek, Mich. They will direct most of the workshop sessions during the two-day meeting.

According to Dr. Milton F. Hartwigsen, chairman of the workshop and head of the CD program on the Brigham Young University campus, the first session will be held Friday morning in the Provo High School auditorium.

Pain Vanishes Through Hypnosis

CHICAGO, May 12.—(UPI)—A psychiatrist said today that persons under the influence of hypnosis do feel pain—it is just that they deny or repress themselves so that they do not consciously feel hurt.

Dr. Eugene A. Kaplan of Spina, N.Y., said he had a year old college student develop through hypnosis, the ability "automatic writing"—that is, the youth's right hand was able to "write anything it wanted to."
